T2

Started on	Monday, 5 October 2026, 2:07 PM
State	Finished
Completed on	Monday, 5 October 2026, 2:08 PM
Time taken	36 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void func(int n)
{
    if(n==1)
    {
      printf("*");
    }
    else
    {
     for(int i=1; i<=n; i++)
     {
       for(int j=1; j<=n; j++)
       {
          printf("*");
          printf("*");
          break;
       }
     }
   }
 }
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer: (penalty regime: 0 %)

```c
#include <stdio.h>

int main() {
    int n;
    if (scanf("%d", &n) != 1) return 0;

    int count = 0;

    count++;
    if (n == 1) {
        count++;
        printf("*");
    }
    else {
        count++;
        for(int i=1; i<=n; i++)
     {
         count++;

    count++;
      for(int j=1; j<=n; j++)
       {
           count++;
           count++;
           count++;
           break;
       }
    }
    }

printf("%d",count);
return 0;

```

```
36 }
```

	Input	Expected	Got	
✔	2	12	12	✔
✔	1000	5002	5002	✔
✔	143	717	717	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
